## REACT. JS DEVELOPER

ReactJS | NodeJS | JavaScript | TypeScript | HTML5 | CSS | Bootstrap

### PROFESSIONAL SUMMARY

- **2 years** of work experience as a **UI Developer**.
- Developed reusable components using React JS library for the user interface.
- Good Knowledge in **React Redux, HTML, CSS, Bootstrap**, and other JavaScript libraries like **Formik form**, etc.
- Exposed in working with latest **React Hooks Functional Programming**.
- Strong hands-on experience with Forms, data tables and Lazy Loading.
- Integrated Redux-Toolkit store management to drill-down API response throughout all the reusable components.
- I have utilized the promise-based **HTTP client Axios** and the Fetch API to interact with and retrieve resources from various APIs.
- Involved in requirement analysis, design and development.
- Experience in Using GIT for code repository and as version control mechanism.
- Strong debugging skills using the browser.
- I am well-versed in Agile methodologies, having applied them in my professional projects, and I possess practical experience utilizing Jira and Confluence for efficient project management and collaboration.
- Ability to be creative and take self-initiatives to manage multiple projects in parallel during critical situations.
- Ability to work independently and with a team.

### SKILL MATRIX

Web Technologies	HTML5, CSS, Bootstrap
IDEs	Visual Studio Code
Frameworks	React, Redux-Toolkit, Redux-forms
Platform	React Js, RESTful web services
Programming Languages	JavaScript, Node Js,
Operating System	Windows
Tools	Visual Studio Code,

### EDUCATION

- BTech, Computer Science, Vignan's institute of Engineering For Women's, India - June 2015 to May 2019

## WORK EXPERIENCE

**Software Engineer**

**Cashapona Technologies Pvt Ltd**

**Jan 2021-Dec 2023**

**Project Name** : **PDS Galaxy**

**Designation** : Software Engineer

**Tools/Technologies** : React, Redux- middleware, Redux-forms, Node JS, Spring-boot, Google Cloud, AWS, Visual Studio Code, Restful Web Services.

### **Roles & Responsibilities:**

- Developed a web application featuring modules such as Data **Repository, Role Management, User Management, WorkQueues, and Reports.**
- Integrated **REST APIs** based on business requirements, utilizing **Redux Toolkit** and context for maintaining the global state of the application.
- Incorporated user-defined forms using **reusable React components.**
- Implemented a dynamic form allowing users to specify form fields and validations, including data type, min and max length, and email validations.
- Integrated a feature enabling users to select favorite windows for quick access upon logging in.
- Implemented role-based authentication and authorization, enabling users to View, Update, Add, and Delete windows (forms) based on granted permissions, and provided support for an existing website.
- Introduced new payment flows and integrated reusable components to enhance functionality and enrich the user experience. □ Utilized Restful web service calls for **POST, PUT, DELETE, and GET** methods.

**Project Name** : **MY COVERAGE CARE**

**Designation** : Software Engineer

**Tools/Technologies** : React, Node.js Redux- middleware, Redux-forms, Node JS, Spring-boot, Google Cloud, AWS, Visual Studio Code, Restful WebServices.

### **Roles & Responsibilities:**

- Integrated **REST APIs** as per the business requirement. Used **Redux tool kit** and context for maintaining global state of the application.
- Integrated User defined forms using **reusable React components.**
- Developed the forms and worked on the Validations, functionality and Worked on the **PA-Login page, Routes**

**Project Name** : **CAMPAIGN MANAGER**

**Designation** : Software Engineer

**Tools/Technologies** : React, Redux- middleware, Redux-forms, Node JS, Google Cloud, AWS, Visual Studio Code, Restful Web Services.

**Roles & Responsibilities:**

- Worked on Developing a web application to view the following modules: Campaign Maintenance, Template maintenance.
- Integrated REST APIs as per the requirement. Used Redux tool kit and context for maintaining global state of the application.
- Integrated User defined forms using reusable React components.
- Integrated dynamic form where user can provide the form fields and validations and Integrated reusable components.

**Project Name** : **GEEZY EXCHANGE**

**Company** : Happiest Minds

**Designation** : Software Engineer

**Description** : Geezy X helps brands and agencies reach their target consumers and deliver their Campaigns successfully & Provides liberty to drive the campaign for the accurate target

**Tools/Technologies** : ReactJs, Visual Studio Code

**Roles & Responsibilities:**

- Worked in using React JS components, Forms, Events, Sliders, Router, Global Map & Redux concept.
- Design, develop ReactJs, HTML5 CSS3, Bootstrap and JavaScript
- Integrated User Defined Forms using reusable React Components
